

Caribbean Risk Managers Ltd

Captive Support Services

CaribRM, in conjunction with external service companies, provides a comprehensive turn-key solution for captive formation and operations in several of the leading offshore jurisdictions for both regional and global captives. Our qualified staff and customised IT systems allow us to effectively offer to our clients ten distinct services:

- actuarial and analytical
- financial
- regulatory
- underwriting
- policy management
- claims processing
- reinsurance design and placement
- loss control
- cash management
- supervision of fronting companies

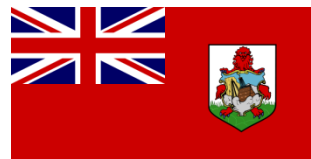

We employ Dynamic Financial Analysis through software developed in-house to find cost-effective solutions for captive companies and to give guidance for most effective risk transfer/retention structures and best use of capital.

We are able to design, register and administrate captives of all kinds and of all sizes, from monolines with a single policy to those with multiple policies and multiple lines of insurance (property, liability, financial loss and fixed benefit) being written in a number of different countries. Our ability to create and operate captives in multiple jurisdictions provides real choice to clients in their decision-making.
